About us:

Ophir Engineers and Consultants (OPC) Private Limited is a premier Electrical Engineering Consultancy and EPC firm delivering precise, reliable, and code-compliant engineering solutions. From detailed electrical designs and technical reports to substation commissioning and power infrastructure support, we provide end-to-end services focused on safety, efficiency, and long-term performance.

OPHIR ENGINEERS AND CONSULTANTS (OPC) PRIVATE LIMITED

Engineering Reliability, Delivering Excellence.

Small description:

We are a premier Electrical Engineering Consultancy and EPC firm dedicated to delivering precise and reliable electrical engineering solutions. We provide detailed, code-compliant designs and reports tailored to the functional and technical requirements of every project. From initial load calculations to the final commissioning of high-voltage substations, we provide end-to-end technical support to ensure your infrastructure is safe, efficient, and future-ready.

Our Core Expertise

Engineering & Design:

We specialize in the "brain work" of electrical systems, including Single Line Diagrams (SLDs), load analysis, cable sizing, and comprehensive earthing & lightning protection designs.

Specialized Power Studies:

Using industry-leading tools like ETAP, we conduct critical safety analysis—including Short Circuit Studies, Relay Coordination, and Arc Flash Analysis—to protect your assets and personnel.

Turnkey EPC Solutions:

We don't just design; we deliver. Our team manages the procurement, installation (erection), and testing of HT/LT Panels, Transformers, and Switchgear for seamless project execution.

Renewable Energy Integration:

We provide specialized consultancy for Solar PV systems, focusing on design optimization, net metering, and grid connectivity.

About the founder:

Rakshana Ophir

Greetings,

I am Rakshan Ophir, the Founder, Director, and Chief Engineer of Ophir Engineers and Consultants (OPC) Private Limited, an engineering consultancy committed to delivering reliable and efficient electrical engineering solutions. With over 4 years of experience in the industry, I specialize in electrical system design, HT/LT power distribution, renewable energy systems, and engineering consultancy services for residential, commercial, and industrial projects.

My professional journey has been driven by a strong passion for engineering excellence, technical precision, and practical problem-solving. As a Licensed Electrical Supervisor, Chartered Engineer, and Chartered Electrical Safety Engineer, I focus on ensuring that every project is executed with the highest standards of safety, quality, and compliance.

I strongly believe that engineering is not just about designing systems, but about creating sustainable, efficient, and future-ready infrastructure that adds long-term value. Through Ophir Engineers and Consultants, I aim to build a technically strong and trusted organization known for professionalism, innovation, and client-focused execution.

With a commitment to continuous learning and modern engineering practices, I continue to work towards delivering dependable solutions that contribute to the growth of the electrical and power sector.

About us page:

Ophir Engineers and Consultants (OPC) Private Limited is a premier Electrical Engineering Consultancy and EPC firm committed to delivering precise, reliable, and technically advanced engineering solutions across residential, commercial, industrial, and infrastructure sectors. We specialize in providing detailed, code-compliant electrical designs and engineering reports tailored to meet the functional, operational, and technical requirements of every project.

Our expertise covers a wide range of electrical engineering services including HT/LT system design, power distribution systems, electrical load analysis, substation design, protection systems, earthing and lightning protection, electrical safety engineering, and renewable energy integration. From the initial planning and design stage to execution support and final commissioning, we provide complete end-to-end technical solutions with a strong focus on safety, efficiency, reliability, and compliance.

At Ophir Engineers and Consultants, we believe that quality engineering forms the foundation of sustainable and future-ready infrastructure. Every project is approached with technical precision, practical engineering insight, and a commitment to delivering long-term value to our clients. Our team works closely with clients, contractors, architects, and project stakeholders to ensure seamless coordination and successful project execution.

Driven by innovation, professionalism, and engineering excellence, we continuously strive to deliver dependable solutions that meet modern industry standards while supporting the growing demands of the power and electrical sector.

Services page:

1. Electrical Design & Engineering

- HT/LT Electrical System Design
- Load Calculations & Sizing
- Single Line Diagrams (SLD)
- Cable Sizing & Routing
- Earthing & Lightning Protection Design
- Transformer & DG Sizing
- Panel Design (LT/HT Panels)
- Power Distribution Design
- Lighting Design (Indoor/Outdoor)

2. Consultancy & Approvals

- Electrical Consultancy for Industrial & Commercial Projects
- Tendering & BOQ Preparation
- Technical Specification Preparation
- Government / DISCOM Coordination Support
- Safety Compliance Advisory
- Energy Audit Support

3. Testing, Commissioning & Supervision

Site Supervision (HT/LT Installations)

Testing & Commissioning of Electrical Systems

Transformer & Panel Testing

Inspection & Quality Assurance

Electrical Safety Audits

4. EPC Services

Turnkey Electrical Projects (EPC)

HT/LT Installation Works

Substation Installation Support

Industrial Electrification

Commercial Electrical Infrastructure

5. Specialized / High-Value Services

Solar Plant Electrical Design (if applicable)

Industrial Automation Support (if you know basics)

Power Quality Analysis

Electrical System Optimization
